ACCOUNTING SYSTEM

Accounting system helps businesses to keep track and manage their financial transactions. That includes sales, purchases, assets and liabilities. Business accounting system is particularly helpful when you need to generate reports. As a business owner you probably already know that proper data reports impact greatly the process of decision making. In the past all data where gathered manually. Luckily today we are living in a computerized age. And that allows us to store the financial records easily. Now you can enter all the data, change them and interpret simply by logging into your accounting system on your computer or mobile phone.

SKILL MANAGEMENT
SOLUTION

Skill Development Mission Information Management Systems software is an end to end skill development trainings management solution that automates the training process life cycle. It is a thoughtfully designed analytic dashboard that provides an easy interpretation of complex data related to institutions, training schedule, students enrolled, faculty, new schemes, projects, batches and finances. Thus loads of data is collated from daily operations, which is then visualized by means of graphs and charts to develop an in-depth insight.

Promulgate skills in the society and motivate the youth to pursue vocational education.

Catalyze the creation of sustainable and quality skills training institutions across the country.

Speed, Scale and Quality are the three driving themes of the Ministry's efforts.

We seek to create synergies between these two areas, so that our youth can aspire to being job seekers and job creators.

Skill Dev
Mobile Application
